

Scenario:

You have decided that you would like to buy a Japanese brand of green paint that is not sold in America. Use the Japanese Imports application to research and buy this item.

Task 1: Find the importer list to find out where the item that you're ordering could be delivered from.

Task 2: Find the "Midori Green" paint in the shop and order the paint.

Task 3: You have received the paint and want to give it a positive review! Give the "Midori Green" paint a positive review.

Notes:

Changes that should be made to the application:

- Add a description to each importer.
- Add a label above/below the categories arrow on the home page.
- Allow for written reviews, rather than just positive and negative.

Things that should be kept the same in the application:

- Selection bar at the bottom of the screen that allows easy access to the "Importers" "Shop" and "Cart" pages.
- Search bar on home page to quickly find items rather than going to a category before searching.
- Subcategories within categories, such as "Paint" within "Art."
